System 450™ Series Modular Controls

Description
System 450™ is a family of modular, digital electronic controls that is easily assembled and set up to provide reliable temperature, pressure, and humidity control for a wide variety of HVAC/R applications, commercial process applications, and industrial process applications.

The System 450 control system is designed to replace System 350™ and System 27 control systems, and to provide many additional features and benefits with fewer than twenty model variations.

System 450 control modules provide a field-configurable out-of-the-box solution. Most System 450 control modules can control temperature, pressure, and humidity systems simultaneously.

System 450 Control Modules with Communications enable you to connect System 450 control systems to Modbus® or Ethernet networks for remote monitoring and setup. The Modbus communications control module is an RS485, RTU-compliant slave device. The Ethernet communications control module has an integral web server that can deliver web pages by means of a direct connection, on your LAN, or across the Internet.

System 450 Reset Control Modules provide many of the features of the standard models for temperature and humidity control. In addition, these modules provide setpoint reset, real-time setback scheduling, and run-time balancing (equal run time) capability.

The System 450 Control Module with Hybrid Analog Output has a single self-selecting analog output to optimize and extend the controlled speed range of variable speed electronically commutated (EC) motors.

Refer to the following documents for important product application information.

- System 450™ Series Modular Controls Product Bulletin (LIT-12011458)
- System 450™ Series Modular Control Systems with Standard Control Modules Technical Bulletin (LIT-12011459)
- System 450™ Series Modular Control Systems with Reset Control Modules Technical Bulletin (LIT-12011842)
- System 450™ Series Modular Control Systems with Communications Control Modules Technical Bulletin (LIT-12011826)

Features
- Durable, compact, interchangeable modular components with plug-together connectors and DIN rail or direct wall mount capability eliminate field wiring between modules and allow you to quickly and easily design, assemble, install, and upgrade your control systems.
- Versatile, multipurpose, field-configurable control modules and expansion modules designed for global use allow you to create a wide variety of application-specific control systems capable of controlling temperature, pressure, or humidity, or all three conditions simultaneously, with only a small suite of module models.
- Up to three hard-wired input sensors and up to ten relay or analog outputs (in any combination) per control system allow you to build complex custom control systems while reducing your control system cost to only the cost of the required components.
- Control modules with bright backlit LCDs and four-button touch pad user interfaces provide quick, clear, visual status of your System 450 control system inputs and outputs with the touch of a button and enable you to quickly and easily set up and adjust your control system.

The Reset Control modules have additional features:

- Adjustable minimum and maximum setpoint temperatures (reset control modules only) enable compliance with the manufacturer’s specifications for your controlled HVAC/R and process equipment.
- Selectable shutdown-high and shutdown-low temperature settings (reset control modules only) saves you energy by turning off controlled equipment when the ambient temperature either rises or drops to a point where heating or cooling is no longer required.
- Real time clock and adjustable setback temperature (reset control modules only) save you energy by setting back heating, cooling, or humidity setpoints during scheduled unoccupied periods (24-hour day, 7-day week schedule).
- User-defined reset control capability (reset control modules only) saves energy in a wide variety of temperature and humidity reset control applications by adjusting the temperature or humidity control loop, based on changes in ambient outdoor temperature or other uncontrolled condition.

The performance specifications are nominal and conform to acceptable industry standards. For applications at conditions beyond these specifications, consult the local Johnson Controls office. Johnson Controls, Inc. shall not be liable for damages resulting from misapplication or misuse of its products. © 2015 Johnson Controls, Inc. www.johnsoncontrols.com
The Control Modules with Communications have additional features:

- Ethernet communication capability through a built-in web server (Ethernet Control Modules only) allows you to monitor your control system status and set up or change the parameters by means of a direct Ethernet cable connection, through a LAN connection, or over the Internet. The built-in web server delivers user-friendly web pages to client browsers on a desktop, laptop, tablet, or smart device.
- The Web page server on Ethernet communication modules provides a simple, intuitive web interface for easy remote monitoring, setup, adjustment and remote monitoring of your control systems across Ethernet networks.
- RS485, RTU-compliant Modbus® network communication capability (Modbus control modules only) enables a head-end RS485 Modbus master controller to read and write control system status and setup parameters to the System 450 Modbus communication control module.
- Password protection for local access (Ethernet and Modbus control modules only) and password protection for remote access (Ethernet control module only) deters unauthorized changes to the control system settings, but allows local and remote monitoring of your control system status.
- Analog output signal limiting features (communication control modules only) allow you to select the rate and condition range at which the control updates the analog output signal, potentially reducing wear on the controlled equipment.
- Binary input with time delay (communication control modules only) allows you to use an external set of dry contacts and selectable time delays to control relay outputs.

Applications

You can create a wide variety of custom, application-specific control systems with System 450 modules. The following are some common control application examples:

- Temperature control
- Pressure control
- Humidity control
- Multipurpose control
- Reset and setback control
- High input-signal selection
- Differential control

Temperature Control

- Temperature monitoring and alarming
- On/Off staged control of boilers and chillers
- Proportional stage control of boilers and chillers
- Boiler and chiller pump control
- Heating and cooling control with deadband
- Floating temperature control of damper and valve actuators
- Cooling tower fan speed/stage control based on water temperature
- Supply, make-up, and mixed air temperature control
- Temperature actuated valve control
- Supply and make-up air damper and fan control
- Condenser fan staging or speed control based on condenser temperature

Refrigerant Pressure Control

- Condenser fan cycling and stage control
- Multispeed condenser fan control
- Floating pressure control of damper and valve actuators
- Condenser fan speed and damper control
- High and low pressure cutout control
- Staged compressor control
- Cooling tower fan speed control based on high-side pressure
- Direct speed control of electronically commutated (EC) condenser fan motors (C450CPW-100 model)

Other Pressure Control

- Relief damper and fan control for building pressurization
- Constant static pressure control

Humidity Control

- On/Off humidification and dehumidification control
- Proportional humidification and dehumidification control
- Multistage humidification and dehumidification control
- Humidity monitoring and alarming

Multipurpose Control

- Temperature and pressure based refrigeration rack control
- Temperature and humidity control of wine cellars and greenhouses
- Temperature, humidity, and static pressure control of clean rooms and greenhouses
- Dehumidification with reheat control

Reset Control

- Boiler supply water temperature reset control based on outside air temperature
- Chiller supply water temperature reset control based on outside air temperature
- VAV zone temperature control based on outside air temperature
- Humidity reset based on outside air temperature
- Staged applications with runtime balancing
- Real-time Occupied/Unoccupied Setback

High Input Signal Selection

- Pressure-based fan speed or fan cycling control on multi-circuit condensers
- Temperature-based fan speed or fan cycling control on multi-circuit condensers

Differential Control

- Air and fluid pump-flow monitoring and alarming
- Air and fluid filter status monitoring and alarming
- Chiller barrel flow monitoring, control, and alarming
- Solar air and water heating applications

Note: Communications modules add network communication to any application of your choosing, except those requiring reset, setback, or EC motor control.

Repair Information

If a System 450 module fails to operate within its specifications, replace the module. For a replacement module, contact your Johnson Controls® representative.

| **Input Signal** | 0 to 5 VDC for humidity sensors  
|                 | 1,035 ohms at 25°C (77°F) for A99 PTC temperature sensors |
| **Output Relay Contacts** | General: 1/2 HP at 120/240 VAC, SPDT  
|                | Specific: AC Motor Ratings  
|                | 120 VAC  
|                | 208/240 VAC  
|                | AC Full-load Amperes: 9.8 A  
|                | 4.9 A  
|                | AC Locked-Rotor Amperes: 58.8 A  
|                | 29.4 A  
|                | 10 Amperes AC Non-inductive at 24/240 VAC  
|                | Pilot Duty: 125 VA at 24/240 VAC |
| **Clock Accuracy** | ±4 minutes per year |
| **Clock Backup Power** | 12 hours (capacitor reserve) |
| **Setback Events** | One occupied and one unoccupied event per day; 7 day schedule |
| **Analog Input Accuracy** | Resolution: 14 bits |
| **Control Construction** | Independently mounted control, surface mounted with Lexan® 950 enclosure suitable for DIN rail mounting or direct mounting to a hard, even surface |
| **Dimensions (H x W x D)** | 127 x 61 x 61 mm (5 x 2-3/8 x 2-3/8 in.) |
| **Weight** | C450RBN-3C: 209 g (0.46 lb)  
|             | C450RCN-3C: 222 g (0.49 lb) |
| **Compliance** | North America: cULus Listed; UL 60730, File E27734;  
|              | FCC Compliant to CFR47, Part 15, Subpart B, Class B;  
|              | Industry Canada (IC) Compliant to Canadian ICES-003, Class B limits |
|              | Europe: CE Mark – Johnson Controls, Inc. declares that this product is in compliance with the essential requirements and other relevant provisions of the EMC Directive and the Low Voltage Directive |
|              | Australia: Mark: C-Tick Compliant (N1813) |

#### C450SPN-1C and C450SQN-1C Expansion Modules with Analog Output

| **Product** | C450SPN-1C: System 450 Expansion Module with one Analog output  
|            | C450SQN-1C: System 450 Expansion Module with two Analog outputs |
| **Power Consumption** | C450SPN-1C: 1.1 VA max using 0 to 10 V out; 1.3 VA maximum using 4 to 20 mA out  
|                  | C450SQN-1C: 1.8 VA max using 0 to 10 V out; 2.2 VA maximum using 4 to 20 mA out |
| **Supply Power** | Internal Supply Power: C450YNN-1C Power Supply Module  
|                 | External Supply Power: 24 VAC (20 to 30 VAC) Safety Extra-Low Voltage (SELV) (Europe), Class 2 (North America),  
|                 | 50/60 Hz, 10 VA minimum  
|                 | Note: A System 450 control module or module assembly can use an internal or an external supply power source, but must not be connected to both simultaneously |
| **Ambient Operating Conditions** | Temperature: -40 to 66°C (-40 to 150°F) when using 0 to 10 VDC outputs;  
|                         | -40 to 40°C (-40 to 104°F) when using 4 to 20 mA outputs  
|                         | Humidity: Up to 95% RH noncondensing; maximum dew point 29°C (85°F) |
| **Ambient Shipping and Storage Conditions** | Temperature: -40 to 80°C (-40 to 176°F)  
|                      | Humidity: Up to 95% RH noncondensing; maximum dew point 29°C (85°F) |
| **Analog Output** | Voltage Mode (0 to 10 VDC):  
|                  | 10 VDC maximum output voltage  
|                  | 10 mA maximum output current  
|                  | Requires an external load of 1,000 ohms or more  
|                  | The AO operates in Voltage Mode when connected to devices with impedance greater than 1,000 ohms. Devices that drop below 1,000 ohms may not operate as intended with Voltage Mode applications |
| **Current Mode (4 to 20 mA):** | Requires an external load between 0 to 300 ohms  
|                       | The AO operates in Current Mode when connected to devices with impedances less than 300 ohms. Devices that exceed 300 ohms may not operate as intended with Current Mode applications |
| **Control Construction** | Independently mounted control, surface mounted with Lexan® 950 enclosure suitable for DIN rail mounting or direct mounting to a hard, even surface |
| **Dimensions (H x W x D)** | 127 x 61 x 61 mm (5 x 2-3/8 x 2-3/8 in.) |
| **Weight** | C450SPN-1C: 150 g (0.33 lb)  
|            | C450SQN-1C: 150 g (0.33 lb) |
| **Compliance** | North America: cULus Listed; UL 60730, File E27734, Vol. 1; FCC Compliant to CFR47, Part 15, Subpart B, Class B  
|              | Industry Canada (IC) Compliant to Canadian ICES-003, Class B limits |
|              | Europe: CE Mark - Johnson Controls, Inc., declares that this product is in compliance with the essential requirements and other relevant provisions of the Low Voltage Directive and the EMC Directive |
|              | Australia: Mark: C-Tick Compliant (N1813) |

System 450™ Series Control Module with Network Communications

Description
System 450™ is a family of modular, digital electronic controls that is easily assembled and set up to provide reliable temperature, pressure, and humidity control for a wide variety of HVAC/R applications, commercial process applications, and industrial process applications.

The System 450 control system is designed to replace System 350™ and System 27 control systems and to provide many additional features and benefits with fewer than twenty model variations.

System 450 control modules provide a field-configurable out-of-the-box solution. Most System 450 control modules can control temperature, pressure, and humidity systems simultaneously.

A single C450 control module can be set up as a stand-alone control or connected to expansion modules to control up to ten On/Off relay and proportional analog outputs, based on any of the three available inputs.

System 450 Control Modules with Communications enable you to connect System 450 control systems to Modbus® or Ethernet networks for remote monitoring and setup. The Modbus communications control module is an RS485, RTU-compliant slave device. The Ethernet communications control module has an integral web server that can deliver web pages through a direct connection, on your LAN, or across the Internet.

- System 450™ Series Modular Controls Product Bulletin (LIT-12011458)
- System 450™ Series Modular Control Systems with Communications Control Modules Technical Bulletin (LIT-12011826)
- System 450™ Series Control Module with RS485 Modbus® Communications Installation Instructions (Part No. 24-7664-2926)
- System 450™ Series Control Module with Ethernet Communications Installation Instructions (Part No. 24-7664-2934)

Features
- Durable, compact, interchangeable modular components with plug-together connectors and DIN rail or direct wall mount capability eliminate field wiring between modules and allow you to quickly and easily design, assemble, install, and upgrade your control systems.
- Versatile, multipurpose, field-configurable control modules and expansion modules designed for global use allow you to create a wide variety of application-specific control systems capable of controlling temperature, pressure, or humidity, or all three conditions simultaneously, with only a small suite of module models.
- Up to three hard-wired input sensors and up to ten relay or analog outputs (in any combination) per control system allow you to build complex custom control systems while reducing your control system cost to only the cost of the required components.
- Control modules with bright backlit LCDs and four-button touch pad user interfaces provide quick, clear, visual status of your System 450 control system inputs and outputs with the touch of a button and enable you to quickly and easily set up and adjust your control system.
- An extensive suite of compatible temperature and humidity sensors, and pressure transducers allows you to monitor and control a wide range of HVAC/R and process conditions in a variety of standard and global units of measurement.
- High input signal selection enables your control system to monitor a temperature, pressure, or humidity condition with two or three sensors (of the same type) and control your system outputs based on the highest condition value sensed by the referenced sensors.

C450CEN Control Module with Communication
- Differential control enables your control system to monitor and maintain a temperature, pressure, or humidity differential between two sensor points within a system, process, or space.
- Ethernet communication capability through a built-in web server (Ethernet control modules only) allows you to monitor your control system status and set up or change the parameters by means of a direct Ethernet cable connection, through a LAN connection, or over the Internet. The built-in web server delivers user-friendly web pages to client browsers on a desktop, laptop, tablet, or smart device.
- The web page server on Ethernet communication modules provides a simple, intuitive web interface for easy remote monitoring, setup, adjustment and remote monitoring of your control systems across Ethernet networks.
- RS485, RTU-compliant Modbus® network communication capability (Modbus control modules only) enables a head-end RS485 Modbus master controller to read and write control system status and setup parameters to the System 450 Modbus communication control module.
- Password protection for local access (Ethernet and Modbus control modules only) and password protection for remote access (Ethernet control module only) deters unauthorized changes to the control system settings, but allows local and remote monitoring of your control system status.
- Analog output signal limiting features (communication control modules only) allow you to select the rate and condition range at which the control updates the analog output signal, potentially reducing wear on the controlled equipment.
- Binary input with time delay (communication control modules only) allows you to use an external set of dry contacts and selectable time delays to control relay outputs.

System 450™ Reset Control Modules with Real-Time Clock and Relay Output

Description
System 450™ is a family of modular, digital electronic controls that is easily assembled and set up to provide reliable temperature, pressure, and humidity control for a wide variety of HVAC/R applications, commercial process applications, and industrial process applications. System 450 Reset Control Modules provide many of the features of the standard models for temperature and humidity control. In addition, these modules provide setpoint reset, real-time setback scheduling, and run-time balancing (equal run time) capability.

The System 450 control system is designed to replace System 350™ and System 27 control systems, and to provide many additional features and benefits with fewer than twenty model variations.

System 450 control modules provide a field-configurable out-of-the-box solution. Most System 450 control modules can control temperature, pressure, and humidity systems simultaneously.

A single C450 control module can be set up as a stand-alone control or connected to expansion modules to control up to ten On/Off relay and proportional analog outputs, based on any of the three available inputs.

Refer to the following documents for important product application information:
- System 450™ Series Modular Controls Product Bulletin (LIT-12011458)
- System 450™ Series Modular Control Systems with Reset Control Modules Technical Bulletin (LIT-12011842)
- System 450™ Series Reset Control Modules with Real-Time Clock and Relay Output Installation Instructions (Part No. 24-7664-2888)

Features
- Durable, compact, interchangeable modular components with plug-together connectors and DIN rail or direct wall mount capability eliminate field wiring between modules and allow you to quickly and easily design, assemble, install, and upgrade your control systems.
- Versatile, multipurpose, field-configurable control modules and expansion modules designed for global use allow you to create a wide variety of application-specific control systems capable of controlling temperature, pressure, or humidity, and all three conditions simultaneously, with only a small suite of module models.
- Up to three hard-wired input sensors and up to ten relay or analog outputs (in any combination) per control system allow you to build complex custom control systems while reducing your control system cost to only the cost of the required components.
- Control Modules with bright backlit LCDs and four-button touch pad user interfaces provide quick, clear, visual status of your System 450 control system inputs and outputs with the touch of a button and enable you to quickly and easily set up and adjust your control system.
- Multipurpose, all-in-one control modules enable simple stand-alone, single-module control systems that are temperature, pressure, and humidity capable out of the box and easy to set up in the field to replace a wide variety of OEM HVAC/R and process controls.
- An extensive suite of compatible temperature and humidity sensors, and pressure transducers allows you to monitor and control a wide range of HVAC/R and process conditions in a variety of standard and global units of measurement.
- High input signal selection enables your control system to monitor a temperature, pressure, or humidity condition with two or three sensors (of the same type) and control your system outputs based on the highest condition value sensed by the referenced sensors.

Repair Information
If the System 450 Reset Control Module fails to operate within its specifications, replace the unit. For a replacement System 450 Reset Control Module, contact the nearest Johnson Controls® representative.

System 450™ Control Module with Hybrid Analog Output

Description

System 450™ is a family of modular, digital electronic controls that is easily assembled and set up to provide reliable temperature, pressure, and humidity control for a wide variety of HVAC/R applications, commercial process applications, and industrial process applications.

System 450 control modules provide a field-configurable out-of-the-box solution. Most System 450 control modules can control temperature, pressure, and humidity systems simultaneously.

A single C450 control module can be set up as a stand-alone control or connected to expansion modules to control up to ten On/Off relay and proportional analog outputs, based on any of the three available inputs.

The System 450 Control Module with Hybrid Analog Output has a single self-selecting analog output to optimize and extend the controlled speed range of variable speed electronically commutated (EC) motors.

Refer to the following documents for important product application information:

- System 450™ Series Modular Controls Product Bulletin (LIT-12011458)
- System 450™ Series Modular Control Systems with Standard Control Modules Technical Bulletin (LIT-12011459)
- System 450™ Series Control Module with Hybrid Analog Output and High Input Signal Selection Installation Instructions (Part No. 24-7664-2802)

Features

- Durable, compact, interchangeable modular components with plug-together connectors and DIN rail or direct wall mount capability eliminate field wiring between modules and allow you to quickly and easily design, assemble, install, and upgrade your control systems.
- Versatile, multipurpose, field-configurable control modules and expansion modules designed for global use allow you to create a wide variety of application-specific control systems capable of controlling temperature, pressure, or humidity, or all three conditions simultaneously, with only a small suite of module models.
- Up to three hard-wired input sensors and up to ten relay or analog outputs (in any combination) per control system allow you to build complex custom control systems while reducing your control system cost to only the cost of the required components.
- Control Modules with bright backlit LCDs and four-button touch pad user interfaces provide quick, clear, visual status of your System 450 control system inputs and outputs with the touch of a button and enable you to quickly and easily set up and adjust your control system.
- Multipurpose, all-in-one control modules enable simple stand-alone, single-module control systems that are temperature, pressure, and humidity capable out of the box and easy to set up in the field to replace a wide variety of OEM HVAC/R and process controls.

Repair Information

If the System 450™ Control Module with Hybrid Analog Output fails to operate within its specifications, replace the unit. For a replacement System 450™ Control Module with Hybrid Analog Output, contact a Johnson Controls® representative.

System 450™ Expansion Modules with Analog Output

Description

System 450 expansion modules allow you to increase the number of outputs in your control system to meet your application requirements. The following models are available:

- C450SPN-1C: Analog Expansion Module with one analog output (each 0 to 10 VDC or 4 to 20 mA)
- C450SQN-1C: Analog Expansion Module with two analog outputs (each 0 to 10 VDC or 4 to 20 mA)

Refer to the following documents for important product application information:

- System 450™ Series Modular Controls Product Bulletin (LIT-12011458)
- System 450™ Series Expansion Modules with Analog Outputs Installation Instructions (Part No. 24-7664-2799)

Features

- Durable, compact, interchangeable modular components with plug-together connectors and DIN rail or direct wall mount capability eliminate field wiring between modules and allow you to quickly and easily design, assemble, install, and upgrade your control systems.
- Versatile, multipurpose, field-configurable control modules and expansion modules designed for global use allow you to create a wide variety of application-specific control systems capable of controlling temperature, pressure, or humidity, or all three conditions simultaneously, with only a small suite of module models.
- Up to three hard-wired input sensors and up to ten relay or analog outputs (in any combination) per control system allow you to build complex custom control systems while reducing your control system cost to only the cost of the required components.

System 450™ Power Module

Description
System 450™ modules require 24 VAC, Class 2 power. In applications where 24 VAC power is not available, the C450YNN-1C Power Module provides a convenient modular solution for transforming 120/240 VAC to 24 VAC power for your System 450 control systems.

Refer to the following documents for important product application information:
- System 450™ Series Modular Controls Product Bulletin (LIT-12011458)
- System 450™ Series Power Module Installation Instructions (Part No. 24-7664-2691)

Features
- Durable, compact, interchangeable modular components with plug-together connectors and DIN rail or direct wall mount capability eliminate field wiring between modules and allow you to quickly and easily design, assemble, install, and upgrade your control systems.

Repair Information
If the System 450 Power Module fails to operate within its specifications, replace the unit. For a replacement System 450 Power Module, contact a Johnson Controls® representative.

Description

System 450 control modules are designed to operate with a variety of compatible sensors and transducers. The System 450 compatible sensors and transducers cover a wide range of temperature, pressure, and humidity conditions, allowing you to select the sensor or transducer that best fits your control system requirements.

For ease of installation and setup, the Sensor Type that you select in the UI for a sensor or transducer automatically determines the sensed condition, unit of measurement, minimum differential, setup value ranges, and the default setup values for each control system output that references the sensor or transducer.

Refer to the System 450™ Series Modular Controls Product Bulletin (LIT-12011458) for important product application information on System 450 Controls.

</tr>
</thead>
<tbody>
<tr>
<td>TE-6000-x</td>
<td>TE-6000 Series 1,000 ohm at 70°F nickel temperature sensors (only). Only the TE-6000-6 sensor can be used for the entire Hi°C and Hi°F temperature range. Different sensing element packages are available for various applications. For a complete list of compatible 1,000 ohm nickel sensors, including sensor descriptions, technical specifications, and mounting accessories, refer to the TE-6000 Series Temperature Sensing Elements Product Bulletin (LIT-216288). (System 450 Sensor Types Hi°C and Hi°F)</td>
</tr>
</tbody>
</table>

### System 450 Compatible TE-6300 Series 1,000 Ohm Nickel Temperature Sensors and Accessories Ordering Information

<table>
<thead>

<tbody>
<tr>
<td>TE-68NT-000S</td>
<td>TE6800 Series 1,000 ohm nickel temperature sensor for wall-mount applications. For more information, including sensor description, technical specifications, and mounting accessories, refer to the TE-6800 Series Temperature Sensors Product Bulletin (LIT-12011542). (System 450 Sensor Types HI°C and HI°F)</td>
</tr>
</tbody>
</table>

System 450 Compatible HE67S3 Type Humidity Sensors with Integral A99B Temperature Sensor Ordering Information

<table>
<thead>
<tr>
<th>Product Code Number</th>
<th>Product Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>HE-67S3-0N0BT</td>
<td>Wall Mount Humidity Sensor with A99B Type Temperature Sensor: 10 to 90% RH; 0 to 60°C (32 to 140°F)</td>
</tr>
<tr>
<td>HE-67S3-0N00P</td>
<td>Duct Mount Humidity Sensor with A99B Type Temperature Sensor: 10 to 90% RH; 0 to 60°C (32 to 140°F)</td>
</tr>
</tbody>
</table>

1. The HE-67S3 sensors require 24 VAC input and must use the 0 to 5 V DC output. Refer to the TrueRH Series HE-67xx Humidity Element with Temperature Sensors Product Bulletin (LIT-216245) on the Johnson Controls Product Literature website for more information, including technical specifications and mounting accessories.

System 450 Compatible HE-6800 Series Humidity Transmitters with Temperature Sensor Ordering Information

<table>
<thead>
<tr>
<th>Product Code Number</th>
<th>Product Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>HE-68N2-0N00WS</td>
<td>Wall Mount Humidity Transmitter with Nickel Temperature Sensor: 0 to 50% RH; 0 to 60°C (32 to 131°F)</td>
</tr>
<tr>
<td>HE-68N3-0N00WS</td>
<td>Wall Mount Humidity Transmitter with Nickel Temperature Sensor: 0 to 90% RH; 0 to 55°C (32 to 131°F)</td>
</tr>
</tbody>
</table>

1. The HE-6800 transmitters require 24 VAC input and must use the 0 to 5 V DC output. Refer to the HE-6800 Series Humidity Transmitters with Temperature Sensor Product Bulletin (LIT-12011625) on the Johnson Controls Product Literature website for more information, including technical specifications and mounting accessories.

System 450 Compatible Low Pressure Differential Transducer Ordering Information

<table>

</tr>
<tr>
<td>DPT2650-10D-AB</td>
<td>Low Pressure Differential Transducer: 0 to 0.1 in. W.C. (System 450 Sensor Type: P 0.1)</td>
</tr>
</tbody>
</table>

1. Refer to the Setra Systems Model DPT265 Very Low Differential Pressure Transducer Catalog Page on the Johnson Controls Product Literature website for more information.
2. The DPT265 sensors require 24 VAC input and must use the 0 to 5 V DC output. Refer to the Setra Systems Model DPT265 Very Low Differential Pressure Transducer Catalog Page on the Johnson Controls Product Literature website for more information.
3. Used only with Communications Control Modules.

System 450 Compatible P499 Series Transducers with 1/4 in. SAE 45 Flare Internal Thread with Depressor (Style 47) Ordering Information
