

INTERNSHIPS – SUMMER 2017

SALES ENGINEERING INTERNSHIP

Our award-winning Building Efficiency Sales Training (BEST) program will give you the opportunity to demonstrate customer focus and prepare you to succeed in a sales engineering career. In this program you will have a chance to apply your technical engineering knowledge and work with customers to better understand product or project needs and be the subject matter expert.

We are seeking sophomore and junior students with majors in engineering or business to join our Technical Sales Internship Program in the Building Efficiency business unit. The program consists of a nine-week training with successful sales executives and managers through e-learning and hands-on, real world experiences.

To apply, keyword search: “Sales Engineering Summer Internship Program”

This program is available in:

Detroit, MI
Las Vegas, NV
Peoria, IL
Tampa, FL
Toronto, ON
Ottawa, ON

ACCOUNTING & FINANCE INTERNSHIP

We are seeking sophomore and junior students majoring in accounting or finance with a strong analytical mindset. Under the supervision of a Finance Manager, interns will work on financial analyses to support and measure business unit results.

In this role, you will work independently and interact with regional and business group contacts to assist in the planning and analysis of quarterly forecasts and profit plans, monthly financial results and key financial targets.

To apply, keyword search: “Accounting and Finance Summer Internship”

This program is available in:

Milwaukee, WI

OPERATIONS & SUPPLY CHAIN INTERNSHIP

If you are a sophomore or junior majoring in operations, engineering or supply chain, join the Global Integrated Supply Chain team in our Building Efficiency business.

Gain experience with end-to-end logistics, strategic sourcing, procurement, manufacturing or material management.

You will gain important skills working independently and as part of a team to ensure our products are getting to customers on time.

To apply, keyword search: “Operations and Supply Chain Summer Internship”

This program is available in:

Largo, FL
Milwaukee, WI
Norman, OK
Waynesboro, PA
Wichita, KS
York, PA

Various other locations may be available!

ENGINEERING INTERNSHIP - POWER SOLUTIONS

Help create a new generation of battery systems to be used in auto, truck, off-road, and/or power sports applications and ensure that our existing customers continue to be satisfied with our best in class product line. Our technical solutions cover the full spectrum of electrification from start-stop systems to dual energy storage systems (lead-acid + lithium ion) and 48V micro-hybrid systems. All of these solutions are geared towards CO2 reduction. This helps automotive OEMs meet increased demands for greenhouse gas emission reduction and improve the fuel efficiency of the vehicles they sell.

This program is available in:
Milwaukee, WI

How will you contribute and gain expertise? During your internship, you will have an opportunity to complete a project in a functional area, including: electrochemistry, mechanical design, modelling, manufacturing equipment design, quality improvement, electronics, and system design.

We are seeking first-year, sophomore, and junior engineering students majoring in chemical, mechanical, manufacturing, materials, industrial or electrical engineering. Positions are available in Product Engineering, Manufacturing Engineering, and Quality Engineering.

To apply, keyword search: "Battery Engineering Internship"

ENGINEERING INTERNSHIP - BUILDING EFFICIENCY

Apply your technical knowledge and business skills to assist our product development and product management teams. Opportunities exist across our business to help design, develop, test, connect, and price our heating, ventilation, air conditioning, and refrigeration products as well as our building management software and systems. We are seeking undergraduate mechanical, electrical, industrial, and software or computer engineers.

This program is available in:
Milwaukee, WI
York, PA

To apply, keyword search: "HVAC Engineering Internship"

MANUFACTURING ENGINEERING INTERNSHIP

Explore a career in manufacturing operations with a summer internship in one of our manufacturing plants. In this internship, you will learn the lead-acid battery manufacturing process to help identify and recommend improvements in key manufacturing processes which are consistent with organizational goals of cost, quality and throughput.

This program is available in:
Middletown, DE
Oconee, SC
St. Joseph, MO
Tampa, FL

We are seeking junior students with majors in Mechanical, Electrical or Manufacturing Engineering.

To apply, keyword search: "Manufacturing Engineering Summer Internship"

INTERNSHIPS IN CORPORATE FUNCTIONS

An internship will help you build new skills while applying your knowledge to real-world projects. From day one, you will have a chance to make an impact, with genuine challenge and responsibility.

Opportunities available in various locations around the US

There will be plenty of opportunities to explore your potential, and you'll have full support of a manager. We'll be with you every step of the way, offering opportunities to build your network, develop your professional skills, and learn about the larger organization and how you contribute.

At the end of the summer internship program, you and all the other interns will complete a presentation to showcase your achievements. You will also have an opportunity to explore additional internships or full-time opportunities if you are graduating.

We are seeking first-year, sophomore, and junior students majoring in Engineering, Business, Computer Science, and other technical fields.
