

# American Recovery & Reinvestment Act (ARRA)

## Program Goals

- Create or preserve up to 3.5 million jobs
- Invest in infrastructure renewal and energy efficiency so that results will have both a short term benefit (creating jobs) and a long-term impact (reducing energy usage and carbon emissions)
- Inject money into the economy in a prompt, fair and reasonable way
- Ensure accountability for how funds are spent through an unprecedented level of transparency that is timely and accurate
- Avoid unnecessary delays and cost overruns on projects that use stimulus funds

## Maximizing the Impact of Stimulus Funds

Get more out of your stimulus funds by combining with an Energy Performance Contract (EPC) AND Get more out of your Energy Performance Contract by strategically using your stimulus funds!

1 + 1 = 3 when combining stimulus funds and an Energy Performance Contract (EPC)

- Use stimulus funds on capital items (non-energy) items within the EPC project
- Use private sector funds to finance the energy saving measures

Result - Larger combined projects addressing a broader range of facilities needs

## Why Choose Johnson Controls

- We are the largest largest ESCO in North America, with over \$4.6B in active guaranteed savings from energy efficiency and water utility projects – means you can feel secure that we have the capability and experience to deliver your project
- We have a dedicated national team focused exclusively on PHA's – we are in constant communication and consultation with HUD and major PHA advocacy groups so that we can provide our customers with the latest information
- Our rigorous measurement and verification process on energy savings projects ensures transparency and guarantees savings are met
- Johnson Controls has the only LEED Platinum Corporate Campus in the world, with investments in solar photovoltaic (PV), geothermal and solar thermal technologies that reduce purchased gas and electricity and reduce our carbon footprint
- Over 1/3 of our development engineers are LEED Certified professionals – we are experts at greening buildings
- With over 340 diverse suppliers, we spend over \$1.7 billion annually on women and minority-owned suppliers and focus on creating LOCAL jobs
- Our Center of Excellence teams know Renewable Energy, Municipal Water Utilities and Central Plants – all focus areas within ARRA.
