

Improve your plant security

Johnson Controls delivers integrated security solutions to thousands of companies worldwide in a variety of markets including industrial, petrochemical, chemical manufacturing and the military. We understand the threats, cost sensitivities and operational requirements associated with typical operating environments, and the need to provide security without negatively impacting your process. We'll work with you to develop a comprehensive yet cost-effective solution to your security concerns and external requirements, including compliance with the 2006 Chemical Security Act and the derivative US Department of Homeland Security (DHS) Chemical Facility Anti-Terrorism Standard.

Working with Johnson Controls

- Single point of contact for delivery and administration
- Bundled and integrated solutions
 - Building management systems and controls
 - Security and fire alarm systems
 - HVAC equipment
 - Chemical, biological and radiological detection and protection
- Implementation of security management best practices
- Integration of security systems with all stakeholder requirements
 - Facility management, Protective force, First responder operations
- Management of legacy systems to protect customer investments
- Global standards and consistency in design, engineering, and pricing
- Security risk assessments in multiple methodologies
 - DHS, American Petroleum Institute, American Chemistry Council
- Over 500 global offices for delivery and service

INDUSTRIAL SOLUTIONS

Johnson Controls provides a comprehensive selection of security and fire protection technologies and services designed to provide safe, efficient and compliant facilities. Our ability to install and integrate the systems that are core to your enterprise results in lower first costs and operational efficiencies.

Intrusion

- Perimeter Detection
- Burglar Alarm

Video Surveillance

- Digital Video Recording
- Video Monitoring
- Video Analytics
- Analog & IP Hybrid

Alarm & Event Monitoring

- Central Station (UL & FM approved)
- Command Center
- Remote notification (Pager/PDA)

Barrier Systems

- Locking hardware
- Fencing, bollards
- Turnstiles
- Traffic controls

Fire Detection & Signaling

- Networked fire panels
- Notification
- Video based fire detection

Access Control

- Registration/enrollment
- Proofing and vetting
- Card production and management

Identity Management

- Biometric identification
- Smart cards
- Automatic vehicle identification (AVI)
- HSPD-12 Credentialing

Policies & Procedures

- Access control/badging
- Visitor management
- Web access
- Training
- Standards and compliance

Plans & Documentation

- Emergency response
- Facility Operations Continuity
- Safety & Security Master Plan
- Incident Management

Communication Systems

- Intercom and paging, PDAs
- Interfaces into related systems

Regulatory Compliance

- Chemical Security Act
- Department of Homeland Security Standards

Johnson Controls has expert service engineers located in offices around the globe to maintain the integrity of your security systems. Choose from a variety of flexible service plans ranging from multiyear, on-site preventative maintenance to simple factory repair of user maintained equipment.

With a Johnson Controls service plan you receive:

- A single service source for every part of your system
- A 24-hour toll free line for customer support
- Remote system troubleshooting
- Periodic preventative maintenance checks to uncover potential problems before they occur
- Prompt access to extensive replacement parts
- Support from thousands of engineers, technicians, and field vehicles
- Award-winning safety programs with a commitment to safe operations
