

Global Safety and Security Technology and Systems Integration Services

Johnson Controls has delivered integrated security solutions to over 50,000 companies worldwide in a variety of markets, including transportation, healthcare, financial services, government, education and manufacturing. We'll work with you to develop a comprehensive solution featuring advanced technologies, backed by our systems integration expertise. Whether you need to protect people, assets, physical property or intellectual property, we'll do what it takes to meet your needs.

We provide a comprehensive selection of security and fire protection technologies and services designed to provide safe, comfortable, and efficient facilities. Our ability to install and integrate the systems that are core to your enterprise results in lower first costs and operational efficiencies.

Technologies:

- Security management systems
- Video surveillance & digital recording
- Intrusion
- Fire alarm systems

Services:

- Site surveys and risk assessments
- Alarm monitoring
- Test and inspection
- Preventative maintenance
- 24-hour emergency services

Installation and Integration:

- More than 500 offices worldwide
- Integration expertise in multiple security and building technologies
- Single point of responsibility for installation and integration

Johnson Controls has what it takes to design a system based on your needs and seamlessly integrate it with your other facility systems for greater efficiency.

Intrusion

- Perimeter Detection
- Burglar Alarm

Video Surveillance

- Digital Video Recording
- Video Monitoring
- Video Analytics
- Analog & IP Hybrid

Alarm & Event Monitoring

- Central Station (UL & FM approved)
- Command Center
- Remote notification (Pager/PDA)

Barrier Systems

- Locking hardware
- Fencing, bollards
- Turnstiles
