

Johnson Controls Institute Course

Using the Metasys® Network Terminal (LM67)

Confidently use the Metasys® Network Terminal (NT) to view and modify data from anywhere on a Metasys® network.

This self-study workbook includes hands-on exercises that can be done on live equipment, using live data--but without jeopardizing building operations. Users will learn how to connect the NT to a controller, log on, monitor and adjust points and create time schedules. This package includes the Metasys® Network Terminal User's Manual (FAN 633.0).

Cost: \$70.00

Topic Outline

- Overview of the Network Terminal
- Review of Metasys® components
- Connecting the Network Terminal
- Modifying Values and Commanding Objects
- Using Time Schedules
