

# Johnson Controls Institute Course

## HVAC System Types (P55)

**Color animated graphics and views of actual HVAC system components provide an in-depth study of the three ASHRAE classifications: all water, all air and air-water HVAC systems.** This two-part learning package explains the differences between the various types of HVAC systems, including the advantages, disadvantages and common applications for each type. The clearly written materials also describe the different control strategies used to control temperature and relative humidity. (©1991 Johnson Controls, Inc.)

### Topic Outline

- All Water Systems
  - One Pipe Systems
  - Two Pipe Systems
  - Four Pipe Systems
  - Unit Ventilator
  - Fan-Coil Unit
- All Air Systems
  - Single Path
  - Dual Path
  - Variable Air Volume
  - Air & Water System
  - Room Control
  - Return Air Control
  - Discharge Control
- Air-Water Systems

**Cost: \$195.00**

**Additional workbooks: 1 -\$24.00 10+ -\$200.00**
