

Johnson Controls Institute Course

Building Environments: HVAC Systems (P99)

Creating healthy, productive indoor environments can be the greatest challenge facing those involved with buildings. **This comprehensive, easy-to-read text builds your understanding of HVAC systems and the controls that manage them.** More than 270 supporting illustrations and examples explain how mechanical and control systems work together to create quality building environments. Learn the technical details behind these complex systems without being overwhelmed! (©1997 Johnson Controls, Inc.)

Topic Outline

- HVAC Systems and Facilities Management
- Heat, Temperature and Pressure Basics
- Managing Human Comfort
- Determining Loads on an HVAC System
- Psychrometrics
- HVAC System Types
- Heat Exchange and Recovery Equipment
- Refrigeration Cycle and Equipment
- Centrifugal Pumps and Hydronic Systems
- Air Cleaning Equipment
- Fans and Ducts
- Humidifiers
- Control Strategies for Occupant Comfort
- Advanced Technology for Effective Facility Control

Cost: \$49.95
