Product Security Advisory

December 3, 2019

Overview
Johnson Controls has learned of four vulnerabilities impacting the Flexera FlexNet Publisher licensing manager. This third-party software is installed with and used by the Software House C•CURE 9000 application.

Impact
Multiple Denial of Service (DoS) vulnerabilities could, under specific circumstances, allow a remote attacker to disrupt the licensing manager service.

A Remote Code Execution (RCE) in the licensing manager components could, under specific circumstances, allow a remote attacker to disrupt the licensing manager service.

Affected Version
Software House C•CURE v2.70 and earlier running FlexNet Publisher version 11.16.1.0 and earlier

Mitigation
Install C•CURE 9000 v2.70 Service Pack 3 Critical Update 05 (Unified 3.70 SP3 CU05) or upgrade to C•CURE 9000 v2.80. These C•CURE updates will also update the FlexNet Publisher components to versions not impacted by these vulnerabilities.

Registered users can obtain the critical software update by downloading the zip file from
