

Product Security Advisory

November 02, 2021

JCI-PSA-2021-17
CVE-2020-11023
ICSA-21-306-01

Overview

Johnson Controls has confirmed a vulnerability potentially impacting Johnson Controls American Dynamics brand VideoEdge. American Dynamics VideoEdge is a high-performance Network Video Recorder that supports multi-channel audio and video. A vulnerability in the JQuery web user interface (UI) component could allow a web page to be altered before it is served to users.

Impact

If exploited, this vulnerability could allow the execution of untrusted code when viewing the VideoEdge admin graphical user interface (GUI).

Affected Versions

- VideoEdge versions prior to 5.7.1

Mitigation

- Upgrade VideoEdge to version 5.7.1
