

### **Product Security Advisory**

October 25, 2022 JCI-PSA-2022-15 CVE-2021-36206

ICSA-22-298-05

Overview

Johnson Controls has confirmed a vulnerability impacting CEVAS, a product from CKS, a Johnson Controls company. CEVAS is a web-based billing and reporting solution for rescue and emergency services.

## **Impact**

The software does not sufficiently validate user-controllable input and could allow a user to bypass authentication and retrieve data with specially crafted SQL queries.

#### **Affected Versions**

• All CEVAS versions prior to 1.01.46

### Mitigation

• Upgrade CEVAS to version 1.01.46

#### **Initial Publication Date**

October 25, 2022

# **Last Published Date**

October 25, 2022
