

# K-12 Security Assessment

The seamless, easy approach, turning threat vulnerabilities into remedies

With physical and cyber school security concerns on the rise, many state governors and district administrators have mandated security assessments to uncover vulnerabilities and risks. In fact, 64% of schools have identified someone or a team that handles safety measures<sup>1</sup>, but pre-packaged guidelines often create vague results that don't mirror a threat gap. With the help of an expert partner like Johnson Controls to conduct a thorough digital assessment, you'll be assured of a comprehensive security plan that addresses all your district's vulnerabilities.

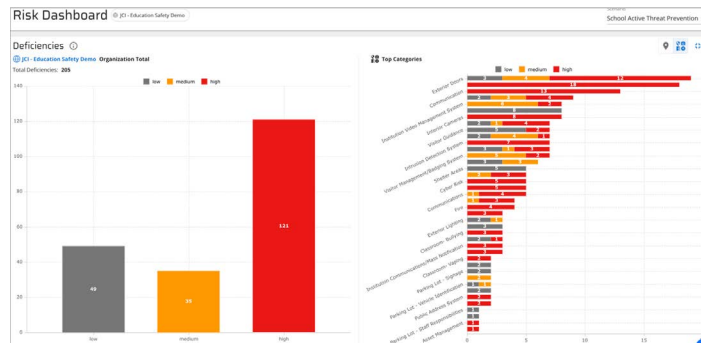

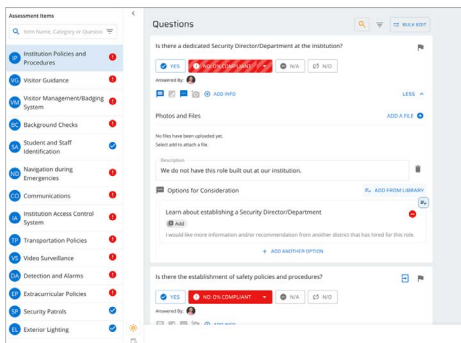

## Your digital safety assessment

Johnson Controls has joined with Partner Alliance for Safer Schools (PASS) and created a digital assessment for any district administrator to effortlessly fill out. In a series of "yes" or "no" questions, this intelligent assessment will generate a tailored security roadmap, based on criticalities,

for each department and area in your district – conveniently administered digitally with no onsite labor needed. We then take those recommendations and line out the available funding, whether that's remaining Elementary and Secondary Emergency Relief (ESSER) funds, grants or Johnson Controls Capital financing options.

## Assessment 100% reimbursable through ESSER funds

Johnson Controls is incredibly motivated to help create safe and healthy learning environments for both students and faculty. Your solution roadmap based on your assessment will not only be tailored to your district's vulnerabilities but the cost of the assessment will also be 100% reimbursable thanks to funding mechanisms such as remaining ESSER funds and the experts on the Johnson Controls grants team.

Risk Assessment Dashboard Example

1. Pew Research Center, 2021, "U.S. school security procedures have become more widespread in recent years but are still unevenly adopted"

## About Johnson Controls

At Johnson Controls, we fully understand and endorse the need to assess campuses for all threats and vulnerabilities. You can lean on our historical knowledge of campus walkthroughs, our expertise in the area surrounding districts,

our partnership with Partner Alliance for Safer Schools (PASS), and our unparalleled security portfolio suite of offerings to package a turnkey process designated and specialized for schools of all sizes and scopes.

## Enhance safety and security among students and staff

Industry-leading solutions help you:

Manage visitors

Mass communicate

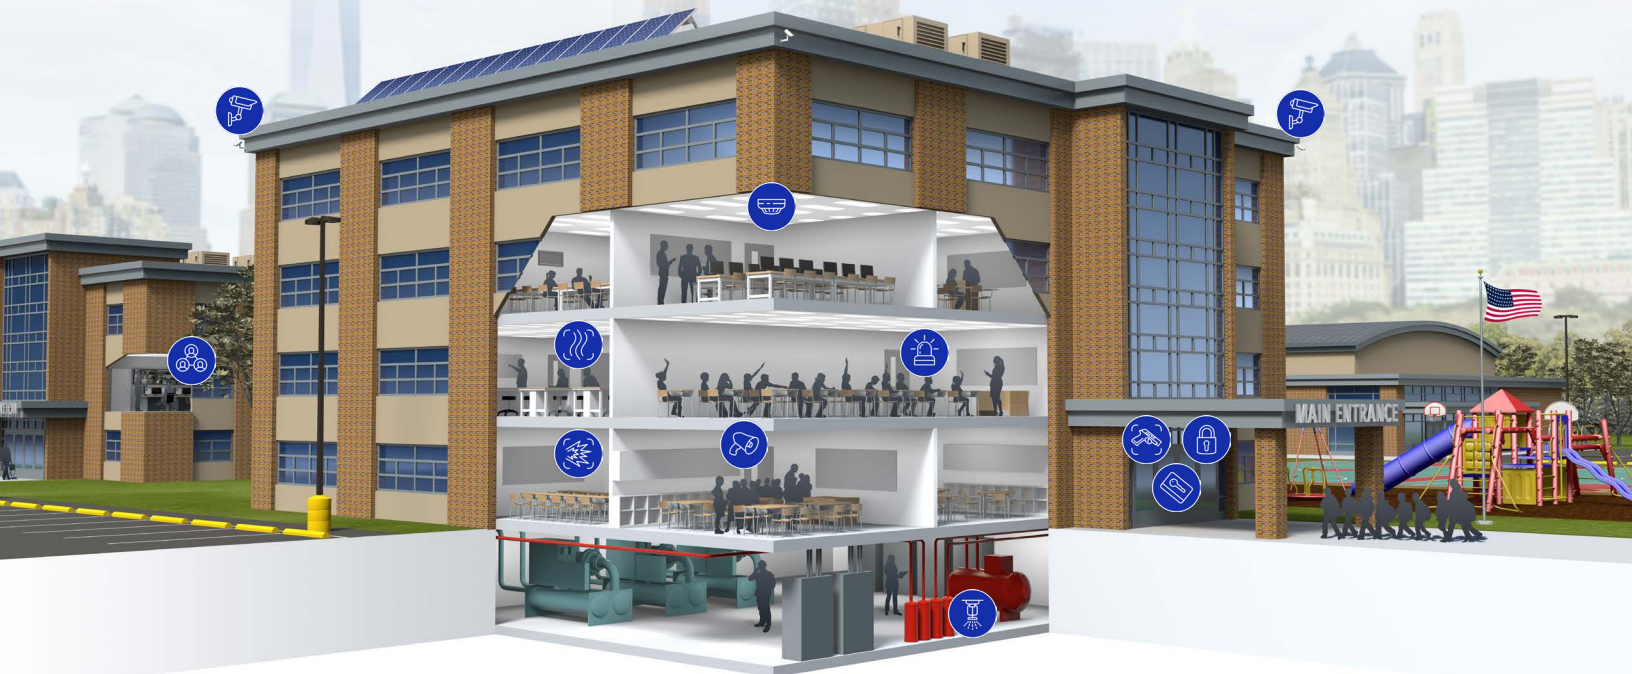

Detect weapons

Meet district mandates

Integrate with legacy technology

- Video Surveillance
- Access Control
- Mass Notification
- Intrusion
- Visitor Management
- Vape Detection
- Shooter Detection
- Lockdown
- Weapons Detection
- Fire Detection
- Fire Suppression

## Schedule your assessment

Take the first step towards more comprehensive campus safety. Contact a Johnson Controls security expert for your no-obligation assessment today.
