

Johnson Controls Response to COVID-19

Ready and Willing to Serve

Johnson Controls is committed to serving the healthcare community during the COVID-19 crisis. We have the global experience, national workforce and healthcare expertise to quickly expand hospital capacity and enhance caregiver response for COVID-19. **Johnson Controls is operationally ready for this mission unlike any other facility technology and services company in the nation.**

Essential Workforce with Healthcare Response Task Force

- Johnson Controls is recognized by federal, state and local governments as a provider of essential products, services and personnel
- COVID-19 Healthcare Response Task Force in every state

Rapid Deployment for all US Army Corps of Engineers (USACE) and US HHS projects

- Complete engineered solutions per USACE design: kits for hotel, convention center, tent
- Center of Excellence design team to deploy designs in hours, not days
- Procurement team to ensure materials and staff are ready to be onsite
- Leverage our building technology manufacturing, products, and engineering expertise
- Designed hospital standard conversion kits with pre-purchased materials
- Dedicated operations resources including project managers, site superintendents and technicians
- Ability to leverage standing USACE contracting vehicles and contracting capability to speed response

Mobilized to provide and maintain essential Alternate Care Sites

- Aligned and unified support across State Government, FEMA, and healthcare networks
- Well-equipped to mobilize quickly, with plans and guidelines to protect our workforce and appropriate procedures if COVID-19 contact does occur
- Utilizing our Wuhan and North American experience for innovation and best practices
- Technical resources focused on healthcare, including planning and design engineers, project managers, installers, clinical communication specialists and service technicians
- Partnering with local companies, diverse suppliers and small businesses to deliver critical equipment and solutions
- Day 2 facilities maintenance for Alternate Care Sites operation along with other hospital needs

We have proven to be a cornerstone of America's health infrastructure

- Johnson Controls solutions are in nearly 85% of North American hospitals
- We have 120 branch locations in North America supported by 25,000 employees
- 13,600 field technicians and mechanics in North America
- Johnson Controls can rapidly mobilize technical resources to help hospitals meet their needs, protect staff and stay ahead of the crisis

Johnson Controls is uniquely qualified to provide healthcare technology equipment, solutions, service, resources and expertise to support urgent clinical capacity expansion and network infrastructure requirements.
