Smart, safe and efficient food and beverage factories

From fire protection to industrial refrigeration, Johnson Controls offers the widest array of advanced solutions to enable smart, safe and reliable food & beverage factories. Components can be applied at will, possibly as interconnected systems or monitored and managed by other systems.

Energy Efficiency

Set indoor conditions for reliable and efficient manufacturing processes.

HVAC

Enhance the comfort of your users as well as your facilities efficiency and sustainability.

Management Systems/Integrated Solutions

Unified and intelligent supervision solutions for enhanced technical functions management.

Industrial Refrigeration

Set indoor conditions for reliable and efficient manufacturing processes.

Security

Prevention systems to protect the entire supply chain against adulteration, tampering, poisoning and theft.

Fire Protection

Protect life and assets from fire and industrial hazards.
