

FACILITY EXPLORER®

EXCEPTIONAL ENVIRONMENTS

THE
EASIEST
CHOICE
IN BUILDING
AUTOMATION

**JUST GOT
EASIER**

TAKE THE FIRST STEP

towards greater productivity and profitability

SOFTWARE EVOLUTION

Facility Explorer delivers the full advantages of the new Niagara4 software to remove dependency on Java browser plug-ins. It's a cleaner, faster, more secure experience.

HARDWARE PLATFORM UPDATE

The new hardware platform (FX80) makes product delivery simple. And a new licensing scheme lets customers identify and scale their product needs more easily.

FX80 AUTOMATION: INTUITIVE, EFFICIENT

Building operators get up and running quickly with tools that are so intuitive, they save training and set-up time and increase productivity.

SUPERIOR SYSTEMS, HIGHER MARGINS

Today's building automation systems come with many possible configurations and capabilities, but they all have one thing in common – customers rely on them for comfort and productivity.

From office buildings to campuses, the Facility Explorer® building management system evaluates, analyzes and optimizes a building's environment. By pairing visionary Johnson Controls engineering and components with a technology platform designed for ease of connectivity and compatibility, Facility Explorer creates exceptional solutions that are efficient, thoughtful and reliable –right out of the gate.

When it is faster and easier to install and use the building automation system, you can deliver exceptional environments simply – at lower costs and higher margins.

“The right software makes maintaining a system MUCH easier.”

TECHNOLOGY THAT GENERATES RESULTS

SCALABLE

With easily customizable components, customers can create the building management system that's as simple or as sophisticated as they need.

CONFIGURABLE

Our systems combine the most technically advanced hardware with industry-leading software to put powerful, easy-to-use control in the hands of our customers.

EXCEPTIONAL

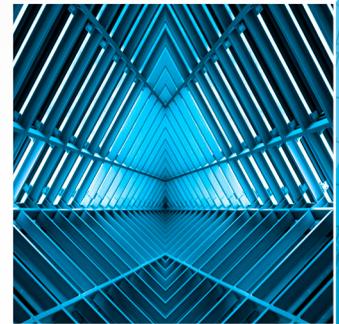

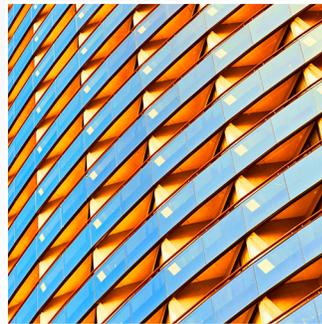

FX is the only system that pairs with JCI components, for the best, most dependable system available, with unique interconnectivity and control.

RELIABLE

FX has become a trusted leader in the industry by offering systems that are consistently best-in-market, industry-tested, and proactively secure.

CLEAR CONTROL

We've made it easier to customize applications for any enterprise – no special tools, no add-ons, no continuous plug-in updates. Just an intuitive control system tailored to a customer's specific requirements.
