

# Controls Solution Center

Turnkey solutions. Parts. Repairs.

## Maximize your investment with OEM parts and expertise

Safeguard the integrity of your Johnson Controls building automation system and controls devices. Repair, replace or develop new components through the Controls Solution Center.

**Extend asset life** with professionals who know your device and can repair it to factory-spec, OEM condition.

**Increase flexibility** with experts who have OEM insight into both hardware and software and can offer cost-effective options.

**Ensure satisfaction** with a one- or three-year warranty for repaired and remanufactured parts.

The power behind **your mission**

### Full range of services promotes uptime

The Controls Solution Center focuses on building automation and controls devices from Johnson Controls as well as other major manufacturers. We deliver expertise in the products you need, including but not limited to:

- Metasys
- Facility Explorer

### The right components for your site

Our team ships new and remanufactured products, services legacy products, provides solutions at the release version that fits your system, and sources hard-to-find parts. You get exactly what you need to keep building operations efficient and productive.

### Expertise saves you time and money

Only the Controls Solution Center brings you the benefits of working with OEM experts.

### Professionals who know your components

The average tenure of our repair technicians is 17 years. Their experience is supported with ready access to technical specs, documentation, engineering notes, update bulletins and other OEM resources.

### Prompt, cost-effective service

Standard repair time is 10 days, with rush and emergency repairs available. High-value remanufactured units help you reduce costs. And because you're working directly with Johnson Controls, you know we'll get it right.

### A commitment to sustainability

We accept all Johnson Controls building automation and controls products for proper recycling, remanufacturing units as possible. Buyback and bounty programs for select items further help reduce waste and drive sustainability.

The power behind your mission
